## PROFESSIONAL SUMMARY

Final-year Computer Science student specializing in full-stack MERN and Next.js development, with applied experience integrating deep learning computer vision models into production-grade web platforms. Built and deployed a full-stack healthcare application (MedVision AI) spanning AI-based diagnostics, role-based workflows, and cloud deployment on AWS.

## EDUCATION

### University of Management and Technology (UMT)

Lahore, Pakistan

Bachelor of Science in Computer Science

Sept. 2022 – July 2026

- **Relevant Coursework:** Deep Learning, Advanced Web Technologies, Data Structures & Algorithms, Object Oriented Programming, Database Management Systems

## PROJECTS

### MedVision AI | Full-Stack AI Healthcare Platform (Final Year Project) | Live Demo

Dec. 2025 – Present

- Designed and built a full-stack, role-based medical platform serving four user types (patient, doctor, radiologist, admin), using Next.js, Node.js, FastAPI, and MongoDB, deployed on AWS EC2.
- Integrated a custom-trained **YOLO11-seg** deep learning model into the application pipeline for automated brain tumor detection and segmentation, achieving a **96.6% IoU** score on validation data.
- Engineered a complete patient journey end-to-end: MRI upload, AI-assisted diagnosis, automated PDF report generation, doctor appointment booking, and live video consultation, plus an AI chatbot (Anthropic API) for natural-language data queries across all four roles.

**Tech Stack:** Next.js, Node.js, Express.js, FastAPI, MongoDB, Python, YOLO11-seg, AWS EC2

### MERN Stack CRM Dashboard

2025

- Architected and developed a real-time CRM dashboard using **React.js** and **Node.js**, with global state management via Context API for dynamic UI updates without page reloads.
- Designed RESTful APIs using Express.js and MongoDB for efficient CRUD operations and persistent data handling.
- Implemented **JWT**-based authentication with role-based access control (Admin, Manager, Team Member), including secured elevated-role registration via invite-code gating.

**Tech Stack:** React.js, Node.js, Express.js, MongoDB, JWT

## EXPERIENCE

### Integriti.io

Lahore, Pakistan (DHA Phase 4)

Software Engineer Trainee

Apr. 2026 – Jun. 2026

- Completed a 2-month traineeship across CMS platforms (**Shopify**, **WordPress**, **Webflow**), implementing incremental feature additions and content updates on live client websites.
- Practiced building responsive pages with the **Elementor** page builder and hand-coded HTML/CSS.

## TECHNICAL SKILLS

**Programming Languages:** JavaScript (ES6+), TypeScript, Python, C++, HTML5, CSS3

**Web Development:** MERN Stack, Next.js, React.js (Hooks, Context API, Zustand), RESTful APIs, FastAPI

**AI/Machine Learning:** Deep Learning, Computer Vision, YOLO (v11-seg), Recurrent Neural Networks (RNNs)

**Databases:** MongoDB (NoSQL), MySQL, Database Design & Management

**DevOps & Tools:** Git/GitHub, AWS EC2, Postman, VS Code

## ACHIEVEMENTS & CERTIFICATIONS

Maintained a **3.71 CGPA** throughout undergraduate studies at University of Management and Technology.

**Software Engineer Trainee Certification** – Integriti.io (CMS Development: Shopify, WordPress, Webflow), June 2026

**English Immersion (SD-100) Certification** – University of Management and Technology, Feb 2026

**Star Peer Tutor** (Artificial Intelligence) – UMT Peer Tutoring Program, Fall 2025
