PROFESSIONAL SUMMARY

Computer Science graduate focused on full-stack MERN and Next.js development, with hands-on experience integrating a deep learning computer vision model into a web application. Built and deployed MedVision AI, a role-based healthcare platform for AI-assisted brain tumor detection, as my final year project. Seeking an entry-level Full-Stack or Software Engineer role to apply my web development skills.

EDUCATION

University of Management and Technology (UMT) Lahore, Pakistan
Bachelor of Science in Computer Science Sept. 2022 – July 2026

- CGPA: 3.72/4.00
- **Award**: Star Peer Tutor (Artificial Intelligence), UMT Peer Tutoring Program, Fall 2025
- **Relevant Coursework**: Deep Learning, Advanced Web Technologies, Cloud Computing, Data Structures & Algorithms, Object Oriented Programming, Database Management Systems

EXPERIENCE

Integriti.io Lahore, Pakistan (DHA Phase 4)
Software Engineer Trainee Apr. 2026 – Jun. 2026

- Built product listing pages and e-commerce features across 4–5 client projects using **Shopify**, **WordPress**, and **Webflow** for e-commerce stores, implementing feature additions and live content updates.
- Developed responsive pages with **Elementor** page builder and hand-coded HTML/CSS; worked on Integriti Studio's website and multiple client sites, translating requirements into functional, production-ready layouts.

PROJECTS

MedVision AI | *AI Healthcare Platform (Final Year Project)* | Live Demo | Code Dec. 2025 – Apr. 2026

- Built a full-stack, role-based platform for four user types (patient, doctor, radiologist, admin) using **Next.js**, **Node.js**, **FastAPI** and **MongoDB** (schemas for users, doctors, appointments, scan results), with **JWT**/**NextAuth** authentication and **Cloudinary** image storage.
- Integrated a custom-trained **YOLO11-seg** model for automated brain tumor detection and segmentation (**96.6% IoU** on validation data), with a **MobileNetV3** classifier to pre-validate uploaded MRI images.
- Implemented the patient workflow: MRI upload, AI-assisted diagnosis, PDF reports with two-stage verification, appointment booking, video consultation, and an Anthropic API chatbot.

Tech Stack: Next.js, Node.js, Express.js, FastAPI, MongoDB, Python, YOLO11-seg, MobileNetV3, NextAuth, Zustand, Cloudinary, Vercel (current hosting), AWS EC2 (initial deployment)

MERN Stack CRM Dashboard | Live Demo | Code 2025

- Developed a CRM dashboard using **React.js** and **Node.js**, with global state management via Context API for dynamic UI updates without page reloads.
- Designed RESTful APIs using Express.js and MongoDB for CRUD operations and persistent data handling.
- Implemented **JWT**-based authentication with role-based access control (Admin, Manager, Team Member), including secured elevated-role registration via invite-code gating.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, C++, HTML5, CSS3
Web Development: MERN Stack, Next.js, React.js (Hooks, Zustand), NextAuth, Tailwind CSS, REST APIs, JWT
AI/Machine Learning: Deep Learning, Computer Vision, YOLO (v11-seg), MobileNetV3, CNNs
Databases: MongoDB (NoSQL), MySQL, Database Design & Management
Tools & Deployment: Git/GitHub, Vercel, AWS EC2 (basic deployment), Cloudinary, Postman, VS Code
Languages: English (IELTS Overall Band 6.5), Urdu
